:.Ms. McArthur..

Since the death of Walter Cronkite, none has matched his professional integrity until Ms. Rachel Maddow, MSNBC investigative reporter..

I had hoped that you would truly be an investigative reporter, that would expose the political cover-up of a murdered child..

Understanding that young girls; and women, are more comfortable talking to another woman, especially in regards to sexual assault, that that would encourage, and help you in your investigation..

However; it seems to be the continuing policy of WCAX, and all the media to not cause waves, nor hold authorities accountable for their public responsibilities..

The authorities policy towards whistle blowers, remains to be Delay: Deny: and Discredit, and failure to even respond or acknowledge this matter is tacit approval of this policy..

Tacit Approval: is No Less Approval..

Investigation of a murdered child would seem to be a worth while investigation, that would justifiably merit professional recognition.. But it would seem that you fit right in with the plethora of news fluffers and fake reporters..

Welcome to Vermont.. You'll fit right in..
